

Course Evaluation Script

I would greatly appreciate your help in improving this course for future students and ask that you complete an online evaluation of this course. By completing this survey, you have the opportunity to provide feedback on what you liked, didn't like, and what I can do to develop this course moving forward. So, please consider each question carefully and give your honest feedback. Also, as you complete the survey, take note that the question scale goes from **strongly disagree** at the top to **strongly agree** at the bottom of the screen.

The evaluation is totally anonymous. I will leave the room before you begin. Evaluation results will not identify you since your evaluation will be combined with all others in the course in aggregate form (or as class totals). Additionally, I will not see the results until after grades are submitted.

To complete the survey:

- 1) *If in a classroom:* Take out your smartphone, tablet, or other electronic device.
If in a computer lab: Log onto the computer.
If in Canvas or online environment: skip to #3
- 2) Open your browser.
- 3) You will use this web link created specifically for me. You should only use this link to evaluate this class. Your other instructors will give you their own links when they want you to evaluate their courses.
- 4) *Provide students with your unique link.*
- 5) *Once your students are set-up, you must leave the room while they complete the evaluation.*
